

Q3 2026 Assessment Control Validation S000591

Artifact p03-full-000591 | Assigned reporting period: 2026-q3 | AC-27 / RISK-031

Assurance purpose

This synthetic assurance report assesses quarterly snapshot interpretation for the named review context. Its evidence test is to test whether the assurance-scope evidence is presented as a dated snapshot rather than a period-wide result. It is a documentation-focused, defensive record for Cobalt Harbor Systems and does not claim a live test, intrusion, compromise, or operating-effectiveness result.

Direct foundation source

This report is assigned to 2026-q3. Its direct foundation is p03-full-000685 (2026-07-15-assessment-assurance-scope-evidence-metrics-tsv-s000685.tsv), whose source review date is 2026-07-15. The source records assurance-scope, case CASE-260713-184, and evidence reference EV-184-14. The assigned period and source date are intentionally shown separately.

Recorded foundation measures

Measure	Value	Unit
Privileged Roles Reviewed	48	records
Timely Attestations	47	records
Evidence Completeness	24	items

Review analysis

Finding: the source supports a limited narrative contribution only. The direct record permits a verifier to test quarterly snapshot interpretation by tracing EV-184-14 to a bounded AC-27 conclusion. The review retains the distinction between 47 timely attestations and final completion after compensating review where those measures appear in the foundation; no prior timing is rewritten.

Ordered evidence test and counterexample

First isolate the assurance-scope source record, then compare its unit and evidence reference with the report claim, and document exactly which statement is supported.

Counterexample: a quarter label turns one dated foundation record into a full-period result. The test requires the report to identify the input as a single review snapshot.

Observation: only a qualified quarterly narrative is supported. The planning coordinator adds the source-scope qualifier before governance circulation.

Recommended disposition

Disposition: the planning coordinator adds a scope qualifier before circulation. Retain the source-supported conclusion with the RISK-031 treatment record and document independent preparer and reviewer roles for any exception disposition. This report is fully fictional, uses no sensitive operational data, and makes no Kio indexing, history, search, chunk, or performance claim.
