

Q3 2026 Assessment Control Validation S005143

Artifact p03-full-005143 | Assigned reporting period: 2026-q3 | AC-27 / RISK-031

Assurance purpose

This synthetic assurance report assesses quarterly decision readiness for the named review context. Its evidence test is to test whether control-validation facts prepare a governance decision without implying a quarter-wide operating result. It is a documentation-focused, defensive record for Cobalt Harbor Systems and does not claim a live test, intrusion, compromise, or operating-effectiveness result.

Direct foundation source

This report is assigned to 2026-q3. Its direct foundation is p03-full-000847 (2026-07-14-assessment-control-validation-evidence-metrics-tsv-s000847.tsv), whose source review date is 2026-07-14. The source records control-validation, case CASE-260713-184, and evidence reference EV-184-08. The assigned period and source date are intentionally shown separately.

Recorded foundation measures

Measure	Value	Unit
Privileged Roles Reviewed	48	records
Timely Attestations	47	records
Evidence Completeness	24	items

Review analysis

Finding: the source supports decision preparation only. The direct record permits a verifier to test quarterly decision readiness by tracing EV-184-08 to a bounded AC-27 conclusion. The review retains the distinction between 47 timely attestations and final completion after compensating review where those measures appear in the foundation; no prior timing is rewritten.

Ordered evidence test and counterexample

First trace the control-validation source date, then test whether the Q3 report distinguishes a planning question from a measured period outcome, and record the exact limitation.

Counterexample: a planning report uses the source to imply that the control operated throughout the quarter. The test requires an explicit statement that no full-period conclusion was derived.

Observation: the source prepares a decision-readiness review only. The assurance manager routes it to the governance agenda with the limitation intact.

Recommended disposition

Disposition: the assurance manager routes the limitation-aware item to the governance agenda. Retain the source-supported conclusion with the RISK-031 treatment record and document independent preparer and reviewer roles for any exception disposition. This report is fully fictional, uses no sensitive operational data, and makes no Kio indexing, history, search, chunk, or performance claim.
