

2026 Q3 Assessment Defensive Testing Assurance Report Pdf Text S009584

Artifact p03-full-009584 | Source p03-src-009584 | Assigned period: 2026 Q3

Review question

How should this quarterly metric interpretation review use the assigned 2026 Q3 record without overstating dependency evidence?

Procedure

Analyst will read the metric name, value, and unit as a constrained quarterly interpretation task. The delimiter-aware local foundation record p03-full-000882 remains the fact authority; its values are retained as supplied. This is a bounded synthetic GRC review, not a penetration test, live-system assessment, or Kio claim.

Dependency source ID	p03-full-000882
Dependency source path	security/pentest-reports/foundation/data/2026-07-14-assessment-review-gap-evidence-metrics-tsv-s000882.tsv
Assigned period	2026 Q3
Dependency source period	2026-07-14
Dependency fact summary	Dependency artifact p03-full-000882 (source p03-src-000882) identifies the metric privileged roles reviewed with a reported value of 48 records.
Control context	Aegis Control AC-27
Risk disposition	RISK-031 remains residual Medium after compensating review

Observation and finding

The source record is fact authority. The record supports interpretation of its fields, not a certification of the control. It does not erase the documented assurance gap: incomplete quarterly privileged-access review evidence created RISK-031; residual risk remains Medium after compensating review.

Accountable action

GRC Evidence Steward will attach an interpretation memo to the evidence register. Preparer and reviewer roles remain separated for exception disposition. Corpus production and QA establish no Kio indexing, history, chunks, search quality, or performance claim.
