

Q3 2026 Assessment Defensive Testing S000624

Artifact p03-full-000624 | Assigned reporting period: 2026-q3 | AC-27 / RISK-031

Assurance purpose

This synthetic assurance report assesses defensive denominator preservation for the named review context. Its evidence test is to test whether the report preserves the synthetic review-population denominator in its defensive-testing interpretation. It is a documentation-focused, defensive record for Cobalt Harbor Systems and does not claim a live test, intrusion, compromise, or operating-effectiveness result.

Direct foundation source

This report is assigned to 2026-q3. Its direct foundation is p03-full-000048 (2026-07-14-assessment-defensive-testing-evidence-metrics-tsv-s000048.tsv), whose source review date is 2026-07-14. The source records defensive-testing, case CASE-260713-184, and evidence reference EV-184-01. The assigned period and source date are intentionally shown separately.

Recorded foundation measures

Measure	Value	Unit
Privileged Roles Reviewed	48	records
Timely Attestations	47	records
Evidence Completeness	24	items

Review analysis

Finding: the source supports a denominator explanation, not workforce language. The direct record permits a verifier to test defensive denominator preservation by tracing EV-184-01 to a bounded AC-27 conclusion. The review retains the distinction between 47 timely attestations and final completion after compensating review where those measures appear in the foundation; no prior timing is rewritten.

Ordered evidence test and counterexample

First select the privileged-role denominator, then test whether the report preserves its synthetic review-population meaning, and finally compare it with the evidence-chain explanation.

Counterexample: the denominator is paraphrased as a workforce count. The test rejects that interpretation because the source defines a bounded review population.

Observation: the measure needs a denominator explanation before summary use. The GRC analyst adds that explanation before assurance distribution.

Recommended disposition

Disposition: the GRC analyst adds the explanation before distribution. Retain the source-supported conclusion with the RISK-031 treatment record and document independent preparer and reviewer roles for any exception disposition. This report is fully fictional, uses no sensitive operational data, and makes no Kio indexing, history, search, chunk, or performance claim.
