

2026 07 13 Threat Model Access Review Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-005076 | Source p03-src-005076 | Review stage: closure follow-up

Assigned report period	2026-07-13
Dependency source ID	p03-src-000004
Dependency artifact ID	p03-full-000004
Dependency source date	2026-07-13
Control / case	AC-27 / CASE-260713-184
Topic / classification	access-review / synthetic-defensive

Review question

Question. For access-review in AC-27, whether RISK-031 is supported without overstating the result during the 2026-07-13 report label while the source row is dated 2026-07-13? The selected analytic protocol is numerator-denominator integrity check.

Procedure

Procedure. The analyst performs the residual-risk rationale review by tie the missing-review condition to the final completion metric and classify the disposition separately. In this report the method recomputes the relationship among population, timely attestations, and final attestations, and documents the result before assessing the residual-risk narrative. Method vocabulary: numerator denominator, arithmetic integrity, population basis, timely rate, final rate, metric trace. The source file is 2026-07-13-threat-model-access-review-evidence-metrics-csv-s000004.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000004 / p03-src-000004 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the numerator-denominator integrity check protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | risk.risk-031: RISK-031 is incomplete quarterly privileged-access review evidence; inherent High and residual Medium after bounded remediation. | date.2026-07-13: Primary review date; evidence intake opens 08:30 UTC and AC-27 review closes 16:45 UTC.

Finding and disposition

Finding and disposition. The numerator-denominator integrity check result supports an AC-27 evidence review of access-review; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Maintain residual medium and route the treatment note to the control owner.

Accountable action

Accountable action. The GRC reviewer records this numerator-denominator integrity check working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-13 versus 2026-07-13), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-005076.
