

2026 07 13 Threat Model Access Review Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-005676 | Source p03-src-005676 | Review stage: normalization

Assigned report period	2026-07-13
Dependency source ID	p03-src-000004
Dependency artifact ID	p03-full-000004
Dependency source date	2026-07-13
Control / case	AC-27 / CASE-260713-184
Topic / classification	access-review / synthetic-defensive

Review question

Question. For access-review in AC-27, whether the late primary attestation changes the assurance conclusion during the 2026-07-13 report label while the source row is dated 2026-07-13? The selected analytic protocol is evidence-chain trace.

Procedure

Procedure. The analyst performs the attestation timing review by compare timely and final completion values while retaining the delayed-attestation history. In this report the method follows the dependency artifact ID, source ID, filename, and spine reference as a single trace, identifying the precise handoff into this working paper. Method vocabulary: artifact lineage, source identifier, filename trace, spine handoff, evidence chain, traceable handoff. The source file is 2026-07-13-threat-model-access-review-evidence-metrics-csv-s000004.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000004 / p03-src-000004 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the evidence-chain trace protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | risk.risk-031: RISK-031 is incomplete quarterly privileged-access review evidence; inherent High and residual Medium after bounded remediation. | date.2026-07-13: Primary review date; evidence intake opens 08:30 UTC and AC-27 review closes 16:45 UTC.

Finding and disposition

Finding and disposition. The evidence-chain trace result supports an AC-27 evidence review of access-review; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Record the compensating-review rationale and retain the original timing distinction.

Accountable action

Accountable action. The GRC reviewer records this evidence-chain trace working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-13 versus 2026-07-13), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-005676.
