| Assigned report period | 2026-07-13                             |
| Dependency source ID   | p03-src-000437                         |
| Dependency artifact ID | p03-full-000437                        |
| Dependency source date | 2026-07-15                             |
| Control / case         | AC-27 / CASE-260713-184                |
| Topic / classification | control-boundary / synthetic-defensive |

## Review question

Question. For control-boundary in AC-27, whether the numerical measures are internally consistent during the 2026-07-13 report label while the source row is dated 2026-07-15? The selected analytic protocol is field-to-case reconciliation.

## Procedure

Procedure. The analyst performs the metric integrity review by test that timely attestations do not exceed population and final attestations equal the reported population. In this report the method constructs a field-level crosswalk from the population and attestation columns to the case identifier, then marks every retained inference as source-backed or out of scope. Method vocabulary: crosswalk, column lineage, case anchor, retained inference, scope exclusion, reconciliation ledger. The source file is 2026-07-15-threat-model-control-boundary-evidence-metrics-csv-s000437.csv; it is treated as a bounded synthetic source, not a live-system export.

## Source-grounded observation

Observation. Dependency p03-full-000437 / p03-src-000437 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the field-to-case reconciliation protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | evidence.set-184: Evidence set 184 is the bounded July 2026 AC-27 review package with 24 synthetic items. | date.2026-07-15: Control-owner remediation-plan and retention-disposition validation date.

## Finding and disposition

Finding and disposition. The field-to-case reconciliation result supports an AC-27 evidence review of control-boundary; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Document the calculation check and keep the source row available for follow-up.

## Accountable action

Accountable action. The GRC reviewer records this field-to-case reconciliation working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-13 versus 2026-07-15), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-000317.
