

2026 07 13 Threat Model Residual Risk Assurance Report Pdf Text

Artifact p03-full-000251 - Searchable assurance report

Assigned review period

2026-07-13

Direct dependency record

p03-full-001052 / p03-src-001052

Dependency source period

2026-07-13

Source facts

Source review date: 2026-07-13; source period: 2026-07-13; topic: access-review; control: AC-27; case: CASE-260713-184; population: 48; timely attestations: 47; final attestations: 48; residual risk: Medium; classification: synthetic-defensive.'

Causal evaluation question

For the approval segregation, does the direct foundation record support this decision: assess whether the residual closure narrative preserves a distinct reviewer and control-owner decision? The assessment keeps the source date distinct from assigned period 2026-07-13.

Evidence selection, procedure, and failure mode

Select the control, case, review date, population, timely, final, residual, and classification facts relevant to approval segregation. identify the reviewer conclusion and the subsequent owner disposition; reject the package if either role is collapsed into a single approval assertion.

Decision rule

Accept the approval segregation conclusion only when the source facts remain internally consistent and the conclusion stays inside the synthetic-defensive AC-27 evidence boundary; otherwise record a bounded variance.

Observation and interpretation

The source supports a separated review path: a timing observation, a compensating completion, and a bounded disposition. It provides no authorization evidence. The direct record remains p03-src-001052 for CASE-260713-184, with 47 timely and 48 final attestations in a 48 record population.

Risk finding

Closure is acceptable only with visible approval segregation and the retained Medium residual position. RISK-031 therefore remains residual Medium within the synthetic-defensive classification.

Owner, timing, and disposition

The governance manager retains the role separation note and requests independent owner acknowledgement in the next review cycle. The result is retained for assigned period 2026-07-13; any variance is handled through the AC-27 exception route rather than by altering the source record.

Linked source narrative

The linked evidence registry identifies evidence set 184 as the bounded July AC-27 package of 24 synthetic items.

Safety boundary

All material is synthetic defensive GRC evidence. It asserts no Kio indexing, history, chunks, search quality, or performance result.
