

2026 07 14 Threat Model Access Review Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-004176 | Source p03-src-004176 | Review stage: intake

Assigned report period	2026-07-14
Dependency source ID	p03-src-000004
Dependency artifact ID	p03-full-000004
Dependency source date	2026-07-13
Control / case	AC-27 / CASE-260713-184
Topic / classification	access-review / synthetic-defensive

Review question

Question. For access-review in AC-27, whether the 48-record completion outcome is adequately evidenced during the 2026-07-14 report label while the source row is dated 2026-07-13? The selected analytic protocol is control-claim boundary test.

Procedure

Procedure. The analyst performs the evidence completeness review by reconcile population, timely attestations, and final attestations against the source row. In this report the method separates AC-27 operating-evidence statements from claims about wider operations, using the classification column as a guardrail against unbounded conclusions. Method vocabulary: claim boundary, operating evidence, classification guardrail, bounded conclusion, wider operations, assertion filter. The source file is 2026-07-13-threat-model-access-review-evidence-metrics-csv-s000004.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000004 / p03-src-000004 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the control-claim boundary test protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | risk.risk-031: RISK-031 is incomplete quarterly privileged-access review evidence; inherent High and residual Medium after bounded remediation. | date.2026-07-13: Primary review date; evidence intake opens 08:30 UTC and AC-27 review closes 16:45 UTC.

Finding and disposition

Finding and disposition. The control-claim boundary test result supports an AC-27 evidence review of access-review; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Use the result only for the bounded synthetic review package.

Accountable action

Accountable action. The GRC reviewer records this control-claim boundary test working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-14 versus 2026-07-13), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-004176.
