

2026 07 14 Threat Model Control Boundary Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-006937 | Source p03-src-006937 | Review stage: control-owner review

Assigned report period	2026-07-14
Dependency source ID	p03-src-000079
Dependency artifact ID	p03-full-000079
Dependency source date	2026-07-14
Control / case	AC-27 / CASE-260713-184
Topic / classification	residual-risk / synthetic-defensive

Review question

Question. For residual-risk in AC-27, whether the supplied evidence remains inside the stated AC-27 control boundary during the 2026-07-14 report label while the source row is dated 2026-07-14? The selected analytic protocol is retention-context assessment.

Procedure

Procedure. The analyst performs the control boundary review by separate review-population facts from organization-wide claims and test the cited control requirement. In this report the method uses the synthetic classification and case linkage to evaluate retention context while keeping the report separate from legal advice or a production records system. Method vocabulary: retention context, synthetic classification, case linkage, legal-advice boundary, records-system boundary, retention rationale. The source file is 2026-07-14-threat-model-residual-risk-evidence-metrics-csv-s000079.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000079 / p03-src-000079 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the retention-context assessment protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | risk.risk-031: RISK-031 is incomplete quarterly privileged-access review evidence; inherent High and residual Medium after bounded remediation. | date.2026-07-14: Evidence normalization, checksum confirmation, and action-owner acknowledgement date.

Finding and disposition

Finding and disposition. The retention-context assessment result supports an AC-27 evidence review of residual-risk; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Retain the bounded population statement and reject any workforce-level inference.

Accountable action

Accountable action. The GRC reviewer records this retention-context assessment working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-14 versus 2026-07-14), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-006937.
