

2026 07 14 Threat Model Control Boundary Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-007117 | Source p03-src-007117 | Review stage: normalization

Assigned report period	2026-07-14
Dependency source ID	p03-src-000079
Dependency artifact ID	p03-full-000079
Dependency source date	2026-07-14
Control / case	AC-27 / CASE-260713-184
Topic / classification	residual-risk / synthetic-defensive

Review question

Question. For residual-risk in AC-27, whether a reviewer can reproduce the disposition from the supplied source during the 2026-07-14 report label while the source row is dated 2026-07-14? The selected analytic protocol is retention-context assessment.

Procedure

Procedure. The analyst performs the decision accountability review by identify the source record, its control, and the stated classification before assigning follow-up ownership. In this report the method uses the synthetic classification and case linkage to evaluate retention context while keeping the report separate from legal advice or a production records system. Method vocabulary: retention context, synthetic classification, case linkage, legal-advice boundary, records-system boundary, retention rationale. The source file is 2026-07-14-threat-model-residual-risk-evidence-metrics-csv-s000079.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000079 / p03-src-000079 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the retention-context assessment protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | risk.risk-031: RISK-031 is incomplete quarterly privileged-access review evidence; inherent High and residual Medium after bounded remediation. | date.2026-07-14: Evidence normalization, checksum confirmation, and action-owner acknowledgement date.

Finding and disposition

Finding and disposition. The retention-context assessment result supports an AC-27 evidence review of residual-risk; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Capture a named review action as a role responsibility, not a claim of live-system execution.

Accountable action

Accountable action. The GRC reviewer records this retention-context assessment working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-14 versus 2026-07-14), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-007117.
