

2026 07 14 Threat Model Evidence Flow Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-004838 | Source p03-src-004838 | Review stage: quarterly planning

Assigned report period	2026-07-14
Dependency source ID	p03-src-000195
Dependency artifact ID	p03-full-000195
Dependency source date	2026-07-15
Control / case	AC-27 / CASE-260713-184
Topic / classification	residual-risk / synthetic-defensive

Review question

Question. For residual-risk in AC-27, whether the evidence can be retained as a synthetic control record during the 2026-07-14 report label while the source row is dated 2026-07-15? The selected analytic protocol is period-label reconciliation.

Procedure

Procedure. The analyst performs the retention disposition review by confirm the classification and case linkage before relating the output to the retention decision. In this report the method compares the report label in the assigned path with the dependency review date and records why a planning-period label does not replace the source event date. Method vocabulary: period label, source event date, planning window, label reconciliation, temporal provenance, date substitution. The source file is 2026-07-15-threat-model-residual-risk-evidence-metrics-csv-s000195.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000195 / p03-src-000195 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the period-label reconciliation protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | control.ac-27: Aegis Control AC-27 requires evidence-backed quarterly access review, approval, retention, and exception disposition. | date.2026-07-15: Control-owner remediation-plan and retention-disposition validation date.

Finding and disposition

Finding and disposition. The period-label reconciliation result supports an AC-27 evidence review of residual-risk; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Route the bounded record to the synthetic retention disposition without asserting legal advice.

Accountable action

Accountable action. The GRC reviewer records this period-label reconciliation working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-14 versus 2026-07-15), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-004838.
