

2026 07 15 Threat Model Control Boundary Assurance Report Pdf Text

Artifact p03-full-000017 - Searchable assurance report

Assigned review period

2026-07-15

Direct dependency record

p03-full-000437 / p03-src-000437

Dependency source period

2026-07-15

Source facts

Source review date: 2026-07-15; source period: 2026-07-15; topic: control-boundary; control: AC-27; case: CASE-260713-184; population: 48; timely attestations: 47; final attestations: 48; residual risk: Medium; classification: synthetic-defensive.'

Causal evaluation question

Can the control-boundary source establish that AC-27 approval and retention duties are in scope without using the evidence metrics as a claim about actual system access?

Evidence selection and counterexample

Select the control field, case field, classification, and boundary-related registry fact. Counterexample: if the report can be read as describing an active account, telemetry stream, or incident, the boundary test fails regardless of completion counts.

Scenario-specific workpaper focus

Apply the attestation-lineage-a-late-attestation-exception-can-be-isolated-triangulation, attestation-lineage-a-late-attestation-exception-can-be-isolated-counterfactual, attestation-lineage-a-late-attestation-exception-can-be-isolated-threshold, and attestation-lineage-a-late-attestation-exception-can-be-isolated-corroboration checks. These checks ask different questions: source-field agreement, alternate-outcome sensitivity, acceptance threshold, and corroborating evidence-chain treatment for this exact review scenario.

Observation and interpretation

The source carries a control-boundary topic, AC-27, CASE-260713-184, and a synthetic-defensive classification. The 47 and 48 measures provide only review context; they do not enlarge the control boundary into operations.

Finding

The evidence supports an administrative control-boundary conclusion: approval, retention, and exception disposition may be assessed as synthetic governance requirements. It does not support a claim that any privileged role exercised access.

Decision, owner, and timing

GRC accepts the bounded boundary statement for the assigned review; the AC-27 control owner must inspect the next derivative for prohibited operational phrasing before the next retention-disposition validation.

Linked source narrative

The linked evidence registry identifies evidence set 184 as the bounded July AC-27 package of 24 synthetic items. The linked date registry identifies 2026-07-15 as remediation-plan and retention-disposition validation.

Safety boundary

All material is synthetic defensive GRC evidence. It asserts no Kio indexing, history, chunks, search quality, or performance result.
