

2026 07 15 Threat Model Evidence Flow Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-000298 | Source p03-src-000298 | Review stage: intake

Assigned report period	2026-07-15
Dependency source ID	p03-src-000965
Dependency artifact ID	p03-full-000965
Dependency source date	2026-07-15
Control / case	AC-27 / CASE-260713-184
Topic / classification	control-boundary / synthetic-defensive

Review question

Question. For control-boundary in AC-27, whether the 48-record completion outcome is adequately evidenced during the 2026-07-15 report label while the source row is dated 2026-07-15? The selected analytic protocol is field-to-case reconciliation.

Procedure

Procedure. The analyst performs the evidence completeness review by reconcile population, timely attestations, and final attestations against the source row. In this report the method constructs a field-level crosswalk from the population and attestation columns to the case identifier, then marks every retained inference as source-backed or out of scope. Method vocabulary: crosswalk, column lineage, case anchor, retained inference, scope exclusion, reconciliation ledger. The source file is 2026-07-15-threat-model-control-boundary-evidence-metrics-csv-s000965.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000965 / p03-src-000965 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the field-to-case reconciliation protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | evidence.set-184: Evidence set 184 is the bounded July 2026 AC-27 review package with 24 synthetic items. | date.2026-07-15: Control-owner remediation-plan and retention-disposition validation date.

Finding and disposition

Finding and disposition. The field-to-case reconciliation result supports an AC-27 evidence review of control-boundary; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Use the result only for the bounded synthetic review package.

Accountable action

Accountable action. The GRC reviewer records this field-to-case reconciliation working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-15 versus 2026-07-15), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-000298.
