

# 2026 07 15 Threat Model Residual Risk Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-000263 | Source p03-src-000263 | Review stage: intake

|                        |                                     |
|------------------------|-------------------------------------|
| Assigned report period | 2026-07-15                          |
| Dependency source ID   | p03-src-001052                      |
| Dependency artifact ID | p03-full-001052                     |
| Dependency source date | 2026-07-13                          |
| Control / case         | AC-27 / CASE-260713-184             |
| Topic / classification | access-review / synthetic-defensive |

## Review question

Question. For access-review in AC-27, whether the review record can be traced from intake through disposition during the 2026-07-15 report label while the source row is dated 2026-07-13? The selected analytic protocol is field-to-case reconciliation.

## Procedure

Procedure. The analyst performs the evidence lineage review by map the record identifier, source filename, and case linkage before reading the metric fields. In this report the method constructs a field-level crosswalk from the population and attestation columns to the case identifier, then marks every retained inference as source-backed or out of scope. Method vocabulary: crosswalk, column lineage, case anchor, retained inference, scope exclusion, reconciliation ledger. The source file is 2026-07-13-threat-model-access-review-evidence-metrics-csv-s001052.csv; it is treated as a bounded synthetic source, not a live-system export.

## Source-grounded observation

Observation. Dependency p03-full-001052 / p03-src-001052 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the field-to-case reconciliation protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | evidence.set-184: Evidence set 184 is the bounded July 2026 AC-27 review package with 24 synthetic items. | date.2026-07-13: Primary review date; evidence intake opens 08:30 UTC and AC-27 review closes 16:45 UTC.

## Finding and disposition

Finding and disposition. The field-to-case reconciliation result supports an AC-27 evidence review of access-review; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Keep the source record in the ac-27 evidence chain and assign a checksum-reconciliation readback.

## Accountable action

Accountable action. The GRC reviewer records this field-to-case reconciliation working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-15 versus 2026-07-13), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-000263.
