

2026 07 15 Threat Model Residual Risk Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-004499 | Source p03-src-004499 | Review stage: closure follow-up

Assigned report period	2026-07-15
Dependency source ID	p03-src-001052
Dependency artifact ID	p03-full-001052
Dependency source date	2026-07-13
Control / case	AC-27 / CASE-260713-184
Topic / classification	access-review / synthetic-defensive

Review question

Question. For access-review in AC-27, whether RISK-031 is supported without overstating the result during the 2026-07-15 report label while the source row is dated 2026-07-13? The selected analytic protocol is period-label reconciliation.

Procedure

Procedure. The analyst performs the residual-risk rationale review by tie the missing-review condition to the final completion metric and classify the disposition separately. In this report the method compares the report label in the assigned path with the dependency review date and records why a planning-period label does not replace the source event date. Method vocabulary: period label, source event date, planning window, label reconciliation, temporal provenance, date substitution. The source file is 2026-07-13-threat-model-access-review-evidence-metrics-csv-s001052.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-001052 / p03-src-001052 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the period-label reconciliation protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | evidence.set-184: Evidence set 184 is the bounded July 2026 AC-27 review package with 24 synthetic items. | date.2026-07-13: Primary review date; evidence intake opens 08:30 UTC and AC-27 review closes 16:45 UTC.

Finding and disposition

Finding and disposition. The period-label reconciliation result supports an AC-27 evidence review of access-review; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Maintain residual medium and route the treatment note to the control owner.

Accountable action

Accountable action. The GRC reviewer records this period-label reconciliation working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-15 versus 2026-07-13), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-004499.
