

2026 07 20 Threat Model Control Boundary Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-006917 | Source p03-src-006917 | Review stage: normalization

Assigned report period	2026-07-20
Dependency source ID	p03-src-000437
Dependency artifact ID	p03-full-000437
Dependency source date	2026-07-15
Control / case	AC-27 / CASE-260713-184
Topic / classification	control-boundary / synthetic-defensive

Review question

Question. For control-boundary in AC-27, whether the late primary attestation changes the assurance conclusion during the 2026-07-20 report label while the source row is dated 2026-07-15? The selected analytic protocol is retention-context assessment.

Procedure

Procedure. The analyst performs the attestation timing review by compare timely and final completion values while retaining the delayed-attestation history. In this report the method uses the synthetic classification and case linkage to evaluate retention context while keeping the report separate from legal advice or a production records system. Method vocabulary: retention context, synthetic classification, case linkage, legal-advice boundary, records-system boundary, retention rationale. The source file is 2026-07-15-threat-model-control-boundary-evidence-metrics-csv-s000437.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000437 / p03-src-000437 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the retention-context assessment protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | evidence.set-184: Evidence set 184 is the bounded July 2026 AC-27 review package with 24 synthetic items. | date.2026-07-15: Control-owner remediation-plan and retention-disposition validation date.

Finding and disposition

Finding and disposition. The retention-context assessment result supports an AC-27 evidence review of control-boundary; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Record the compensating-review rationale and retain the original timing distinction.

Accountable action

Accountable action. The GRC reviewer records this retention-context assessment working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-20 versus 2026-07-15), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-006917.
