

2026 07 20 Threat Model Evidence Flow Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-004258 | Source p03-src-004258 | Review stage: normalization

Assigned report period	2026-07-20
Dependency source ID	p03-src-000965
Dependency artifact ID	p03-full-000965
Dependency source date	2026-07-15
Control / case	AC-27 / CASE-260713-184
Topic / classification	control-boundary / synthetic-defensive

Review question

Question. For control-boundary in AC-27, whether a reviewer can reproduce the disposition from the supplied source during the 2026-07-20 report label while the source row is dated 2026-07-15? The selected analytic protocol is control-claim boundary test.

Procedure

Procedure. The analyst performs the decision accountability review by identify the source record, its control, and the stated classification before assigning follow-up ownership. In this report the method separates AC-27 operating-evidence statements from claims about wider operations, using the classification column as a guardrail against unbounded conclusions. Method vocabulary: claim boundary, operating evidence, classification guardrail, bounded conclusion, wider operations, assertion filter. The source file is 2026-07-15-threat-model-control-boundary-evidence-metrics-csv-s000965.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000965 / p03-src-000965 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the control-claim boundary test protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | evidence.set-184: Evidence set 184 is the bounded July 2026 AC-27 review package with 24 synthetic items. | date.2026-07-15: Control-owner remediation-plan and retention-disposition validation date.

Finding and disposition

Finding and disposition. The control-claim boundary test result supports an AC-27 evidence review of control-boundary; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Capture a named review action as a role responsibility, not a claim of live-system execution.

Accountable action

Accountable action. The GRC reviewer records this control-claim boundary test working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-20 versus 2026-07-15), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-004258.
