

2026 07 20 Threat Model Residual Risk Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-000303 | Source p03-src-000303 | Review stage: normalization

Assigned report period	2026-07-20
Dependency source ID	p03-src-000252
Dependency artifact ID	p03-full-000252
Dependency source date	2026-07-14
Control / case	AC-27 / CASE-260713-184
Topic / classification	access-review / synthetic-defensive

Review question

Question. For access-review in AC-27, whether a reviewer can reproduce the disposition from the supplied source during the 2026-07-20 report label while the source row is dated 2026-07-14? The selected analytic protocol is field-to-case reconciliation.

Procedure

Procedure. The analyst performs the decision accountability review by identify the source record, its control, and the stated classification before assigning follow-up ownership. In this report the method constructs a field-level crosswalk from the population and attestation columns to the case identifier, then marks every retained inference as source-backed or out of scope. Method vocabulary: crosswalk, column lineage, case anchor, retained inference, scope exclusion, reconciliation ledger. The source file is 2026-07-14-threat-model-access-review-evidence-metrics-csv-s000252.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000252 / p03-src-000252 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the field-to-case reconciliation protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | control.ac-27: Aegis Control AC-27 requires evidence-backed quarterly access review, approval, retention, and exception disposition. | date.2026-07-14: Evidence normalization, checksum confirmation, and action-owner acknowledgement date.

Finding and disposition

Finding and disposition. The field-to-case reconciliation result supports an AC-27 evidence review of access-review; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Capture a named review action as a role responsibility, not a claim of live-system execution.

Accountable action

Accountable action. The GRC reviewer records this field-to-case reconciliation working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-07-20 versus 2026-07-14), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-000303.
