

2026 Q3 Threat Model Access Review Assurance Report

Synthetic defensive GRC working paper | Artifact p03-full-007276 | Source p03-src-007276 | Review stage: quarterly planning

Assigned report period	2026-q3
Dependency source ID	p03-src-000265
Dependency artifact ID	p03-full-000265
Dependency source date	2026-07-15
Control / case	AC-27 / CASE-260713-184
Topic / classification	control-boundary / synthetic-defensive

Review question

Question. For control-boundary in AC-27, whether the evidence can be retained as a synthetic control record during the 2026-q3 report label while the source row is dated 2026-07-15? The selected analytic protocol is retention-context assessment.

Procedure

Procedure. The analyst performs the retention disposition review by confirm the classification and case linkage before relating the output to the retention decision. In this report the method uses the synthetic classification and case linkage to evaluate retention context while keeping the report separate from legal advice or a production records system. Method vocabulary: retention context, synthetic classification, case linkage, legal-advice boundary, records-system boundary, retention rationale. The source file is 2026-07-15-threat-model-control-boundary-evidence-metrics-csv-s000265.csv; it is treated as a bounded synthetic source, not a live-system export.

Source-grounded observation

Observation. Dependency p03-full-000265 / p03-src-000265 states population 48, timely attestations 47, final attestations 48, and residual risk Medium. Under the retention-context assessment protocol, these values are interpreted only through the listed source fields. Its spine reference is: org.cobalt-harbor: Cobalt Harbor Systems is a fictional managed logistics and harbor-operations platform organization. | risk.risk-031: RISK-031 is incomplete quarterly privileged-access review evidence; inherent High and residual Medium after bounded remediation. | date.2026-07-15: Control-owner remediation-plan and retention-disposition validation date.

Finding and disposition

Finding and disposition. The retention-context assessment result supports an AC-27 evidence review of control-boundary; it does not establish an incident, an intrusion, or a claim about any real organization. RISK-031 remains residual Medium after bounded remediation. Route the bounded record to the synthetic retention disposition without asserting legal advice.

Accountable action

Accountable action. The GRC reviewer records this retention-context assessment working paper under CASE-260713-184, preserves the assigned/source period distinction (2026-q3 versus 2026-07-15), and asks the AC-27 control owner to acknowledge the next review step. Corpus production and QA make no Kio indexing, history, chunk, search-quality, or performance claim.

Prepared for Cobalt Harbor Systems synthetic AC-27 evidence set 184. Record key: p03-full-007276.
