

2026 Q3 Threat Model Residual Risk Assurance Report Pdf Text

Artifact p03-full-000203 - Searchable assurance report

Assigned review period

2026-Q3

Direct dependency record

p03-full-001052 / p03-src-001052

Dependency source period

2026-07-13

Source facts

Source review date: 2026-07-13; source period: 2026-07-13; topic: access-review; control: AC-27; case: CASE-260713-184; population: 48; timely attestations: 47; final attestations: 48; residual risk: Medium; classification: synthetic-defensive.'

Causal evaluation question

For the quarterly owner escalation, does the direct foundation record support this decision: decide whether the planning owner has an adequate basis to carry a residual access-review concern into the Q3 agenda? The assessment keeps the source date distinct from assigned period 2026-Q3.

Evidence selection, procedure, and failure mode

Select the control, case, review date, population, timely, final, residual, and classification facts relevant to quarterly owner escalation. contrast the owner planning decision with the underlying dated source, and reject escalation if it claims remediation eliminated the observed timing gap.

Decision rule

Accept the quarterly owner escalation conclusion only when the source facts remain internally consistent and the conclusion stays inside the synthetic-defensive AC-27 evidence boundary; otherwise record a bounded variance.

Observation and interpretation

The owner receives a bounded review result containing both an exception measure and a completion measure. Neither metric establishes an operational access condition. The direct record remains p03-src-001052 for CASE-260713-184, with 47 timely and 48 final attestations in a 48 record population.

Risk finding

Q3 escalation is warranted as governance follow-up, not as an assertion of unresolved live access. RISK-031 therefore remains residual Medium within the synthetic-defensive classification.

Owner, timing, and disposition

The planning owner places the concern on the Q3 agenda and assigns the control steward to report the next evidence-chain status. The result is retained for assigned period 2026-Q3; any variance is handled through the AC-27 exception route rather than by altering the source record.

Linked source narrative

The linked evidence registry identifies evidence set 184 as the bounded July AC-27 package of 24 synthetic items.

Safety boundary

All material is synthetic defensive GRC evidence. It asserts no Kio indexing, history, chunks, search quality, or performance result.
