

# 2026 Q3 Threat Model Residual Risk Assurance Report Pdf Text

Artifact p03-full-000031 - Searchable assurance report

**Assigned review period**

2026-Q3

**Direct dependency record**

p03-full-000623 / p03-src-000623

**Dependency source period**

2026-Q3

**Source facts**

Source review date: 2026-07-13; source period: 2026-Q3; topic: residual-risk; control: AC-27; case: CASE-260713-184; population: 48; timely attestations: 47; final attestations: 48; residual risk: Medium; classification: synthetic-defensive.'

**Causal evaluation question**

For Q3 planning, does the residual-risk record justify retaining a Medium governance risk after bounded remediation?

**Evidence selection and counterexample**

Select the Q3 period reference, residual rating, risk rationale, and planning boundary. Counterexample: reject the planning conclusion if the source review date is used as the Q3 period or if remediation is represented as risk elimination.

**Scenario-specific workshop focus**

Apply the approval-separation-a-late-attestation-exception-can-be-isolated-triangulation, approval-separation-a-late-attestation-exception-can-be-isolated-counterfactual, approval-separation-a-late-attestation-exception-can-be-isolated-threshold, and approval-separation-a-late-attestation-exception-can-be-isolated-corroboration checks. These checks ask different questions: source-field agreement, alternate-outcome sensitivity, acceptance threshold, and corroborating evidence-chain treatment for this exact review scenario.

**Observation and interpretation**

The source combines a 2026-07-13 review event with a distinct Q3 planning reference. The 47 timely and 48 final figures inform the residual-risk rationale but do not define the planning calendar.

**Finding**

Q3 planning retains RISK-031 at Medium residual risk because compensating review closes the bounded evidence gap without negating the original timing exception.

**Decision, owner, and timing**

The GRC planning owner carries the Medium residual rating through Q3 and schedules a period-end evidence review; no action is assigned as a seven-day closure validation.

**Linked source narrative**

The linked evidence registry identifies evidence set 184 as the bounded July AC-27 package of 24 synthetic items. The linked planning-period registry defines 2026-Q3 as 2026-07-01 through 2026-09-30.

**Safety boundary**

All material is synthetic defensive GRC evidence. It asserts no Kio indexing, history, chunks, search quality, or performance result.
