

Study Alpha journey map summary

Beacon Field Research | Study Alpha | 2026-07-13 | session UX-184 | n=24 | Synthetic composites S01-S24

Decision frame

The synthetic journey map centers on confidence at five stages: Discover, Orient, Act, Confirm, and Complete.

Primary insight

Progress breaks down when labels do not predict an outcome, confirmation is hard to perceive, or help requires losing context.

Accessibility touchpoints

Use plain-language task labels, visible current-state information, keyboard-reachable confirmation, and contextual help that preserves position.

Opportunities

Prototype a result preview before action; place confirmation in the action path; provide recovery before a user reaches a terminal error.
