Session Room Setup

Beacon Field Research | Study Alpha | 2026-07-13 | session UX-184 | n=24

Room purpose

Prepare a quiet moderated-session environment for Beacon Field Research Study Alpha. The standard route is remote; the accessible remote fallback remains ready throughout.

Setup checklist

Use a neutral virtual background; display the session code only; enable captions if requested; verify keyboard navigation; prepare a text-chat fallback; and keep observers muted with cameras off.

Privacy boundary

Do not record faces, voices, names, contact details, credentials, or screens containing personal information. Capture de-identified notes only after consent confirmation.

Failure response

If the room becomes inaccessible or consent is unclear, pause. Offer a fallback, reschedule using the synthetic code, or end the session.

Synthetic research artifact. Participant codes only; no real PII, recordings, faces, voices, credentials, or copied content.
