# Data Handling Protocol

*Beacon Field Research | Study Alpha | 2026-07-13 | session UX-184 | n=24*

## Scope

This protocol covers Study Alpha notes for n=24 60-minute moderated sessions, including UX-184.

## Collect

Synthetic code, cohort, consent state, task evidence, timestamps, requested accommodation category, and analyst-coded themes.

## Do not collect

Names, email addresses, phone numbers, faces, voice recordings, credentials, device identifiers, or copied materials.

## Store and hand off

Keep evidence in approved project storage, limit access to the study team, label observations versus interpretation, and pass analysis a de-identified evidence package.

## Retention

Retain only the working evidence needed for synthesis; remove accidental personal details immediately and document the correction.

---

**Synthetic research artifact.** Participant codes only; no real PII, recordings, faces, voices, credentials, or copied content.
