

UX-184 transcript review

Beacon Field Research | Study Alpha | 2026-07-13 | session UX-184 | n=24

Review purpose

Quality review of a synthetic moderated-session excerpt. Scope is transcript completeness and timestamp continuity, not participant measurement.

Session framing

Synthetic participant S08 completed a workspace, save-observation, and share-summary sequence over 55 represented minutes.

Timestamp checkpoints

00:00 introduction; 05:00 task start; 10:20 filter pause observed; 17:10 save task; 25:20 confirmation follow-up; 30:00 share task; 43:15 debrief; 54:30 close.

Reviewer notes

Moderator wording remains neutral. Observed behavior is distinguished from interpretation. Labels were scanned before selection, and the confirmation cue was noticed late.

Disposition

Approved as a fully synthetic analysis record. Cross-reference: recorder log and speaker-turn sample use the same UX-184 timestamps.

Synthetic research record - no real participant data, recordings, identities, or quotes.
