

Internal API Style Guide

Internal reference | Aster Loop K.K. | p95 184 ms | ADR-042

Request shape

Use plural noun resources, opaque IDs, camelCase fields, idempotency for creates, and X-Request-Id for correlation.

Response shape

Return a stable state, request ID, and safe errors. Product Alpha R7 transitions through awaiting approval under ADR-042.

Area	Preferred	Avoid
Error	Safe code + request ID	Raw transport detail
Pagination	Opaque stable cursor	Offset with unstable order
Approval	ADR-042 state	Boolean bypass

Examples

A create request returns awaiting approval; a status request returns completed after the approval and worker path.

Anti-patterns

Do not expose vendor internals, accept client approval flags, parse cursors, or describe a 184 ms control-plane target as worker completion time.
