

Release Governance Reference

Internal reference | Aster Loop K.K. | p95 184 ms | ADR-042

Evidence

Retain fixture results, request IDs, event IDs, and the p95 184 ms control-plane observation for Product Alpha R7.

Approvals

ADR-042 makes approval a visible transition. An awaiting state is not an execution authorization.

Control	Evidence	Owner role
Latency	p95 184 ms fixture	Performance Owner
Approval	ADR-042 event	Release Owner
Rollback	Named transition	Operations Owner

Rollback

Pause rollout, preserve evidence, move to a named failed or awaiting state, and review compatibility impact.

ADR lifecycle

Draft context, accept decision, publish consequences, review evidence after the 2026-07-13 window, then supersede only through a new record.
