

ADR-042 Approval Record

Aster Loop (synthetic organization) | Product Alpha R7 | 2026-07-13 | p95 184 ms | ADR-042

Decision

Approve the asynchronous release gate for Product Alpha R7, subject to the p95 184 ms and compatibility stop conditions.

Evidence reviewed

Synthetic R7 release cohort observed p95 184 ms; durable admission was 45 ms against a 46 ms target.

Objection

A synchronous gate has a simpler client request and response story.

Resolution

A durable ticket gives a clearer recovery boundary and duplicate handling path. Pending and timed_out are explicit client states.

Synthetic role sign-offs

Software Engineering accepted typed transitions. Release Engineering accepted the stop conditions. Platform accepted subject to deterministic schema guard.

Integrity

This fully synthetic approval record contains no customer data, secrets, credentials, or personal information.
