

Architecture pre-read

Aster Loop (synthetic organization) | Product Alpha R7 | 2026-07-13 | p95 184 ms | ADR-042

Problem

A synchronous gate couples downstream completion to client latency.

Options

Keep synchronous gate; client retry; fire-and-forget; or ADR-042 durable asynchronous admission.

Latency evidence

28 edge + 32 validation + 46 admission + 24 publish + 18 observability + 36 reserve = 184 ms.

Questions for review

Is ticket ownership clear? Are v1 contracts compatible? Are rollback triggers actionable?
Which role records evidence?
